MARCO TARABINI
**Vice Rector of the Lecco Territorial
Campus, Politecnico di Milano**

Marco Tarabini

Vice Rector of the Lecco Territorial Campus, Politecnico di Milano

Marco Tarabini is Vice Rector of the Lecco Territorial Campus and Full Professor of Mechanical and Thermal Measurements at the Department of Mechanical Engineering, Politecnico di Milano. For many years, he has worked at the intersection of academia, industry and local communities, developing a profile centred on applied research, technology transfer and the creation of collaborative platforms for innovation.

His research focuses on measurement systems, sensors, assessment of human exposure to vibration, biomechanics and the development of technological solutions for industrial environments. He has coordinated more than 40 research projects funded by public bodies and private companies, collaborating closely with industrial partners and local institutions. He is co-inventor of six patents and author of more than 200 Scopus-indexed scientific publications.

Throughout his career, he has played a leading role in strengthening the links between research, industry and technical standardisation. He has served as Scientific Coordinator of the JRP MATT project, member of the Lecco Metalworking District Committee, Convenor of ISO TC108/SC4/WG13, Senior Member of IEEE, member of the International Advisory Committee on Hand-Arm Vibration, and founder of the Polilink@Lecco service. In his institutional role, he promotes the Lecco Territorial Campus as a platform connecting scientific excellence, industrial needs and regional development.

Visione

The Lecco Territorial Campus provides an ideal environment in which the University can develop innovative approaches to education and research in close collaboration with the local industrial, institutional and professional ecosystem. The Campus operates within a region characterised by a strong manufacturing tradition, a significant presence of technologically advanced companies, a cohesive institutional network, and a growing demand for innovation in engineering, architecture and design.

The vision for the Lecco Territorial Campus is that of a university platform deeply rooted in its local community while being fully integrated into the University's strategic development. It brings together education, applied research, technology transfer and institutional collaboration, creating an environment where innovation can thrive. Data and digital technologies represent the main drivers of future growth, acting as enabling tools across all areas of activity.

Through its presence in Lecco, Politecnico di Milano aims to enhance the attractiveness and competitiveness of the region by attracting students, researchers, businesses, highly qualified professionals, investment and high-value collaborative initiatives.

Questa traduzione mantiene lo stesso stile adottato per le versioni in inglese di Luigi Colombo, garantendo uniformità terminologica e di tono tra i profili dei Prorettori. In particolare, ho mantenuto l'uso di Vice Rector, Territorial Campus, technology transfer, applied research e local communities, che riflettono il lessico normalmente utilizzato nelle pubblicazioni istituzionali internazionali del Politecnico di Milano.
