This temporary research fellowship cannot be awarded to people enrolled in a laurea (equivalent of Bachelor of Science), laurea specialistica or magistrale (equivalent to Master of Science), PhD students with a scholarship, or students enrolled in medical specialisation courses, in Italy or abroad. The award of the research grant requires placement on unpaid leave for employees in service in public administrations other than those mentioned in paragraph 5 of this article.

Exclusion from participation in the selection applies in the case of marriage, kinship or affinity up to and including the fourth degree, or same-sex registered partnership (as per art. 1 of Law No. 76 of 20.05.2016), or cohabiting couple (as per art. 1, paragraphs 37 et seq. of Law No. 76 of 20.05.2016) with:

- a Full professor or Associate professor in the Department/Campus¹² that issued this call for applications;
- the Rector;
- the Director General;
- a member of the Board of Governors.

Graduates who have already been awarded temporary research fellowships pursuant to art. 22 of Law 240/2010, for 6 years (not including the period in which the fellowship overlapped enrolment in a PhD course without scholarship, for no longer than the legal duration of the course), cannot take part in the selection. Graduates who cannot carry out the research activity for the entire period stated in article 1 of the call for applications because the temporal limits set forth in art. 22, third paragraph or ninth paragraph of

Research fellows can perform professional activities and enter contracts that can be included in the self-employment category, on condition that these activities do not interfere with the successful execution of the research activities subject of this contract. The written authorisation of the Head of the Department/Campus (who must consult the Scientific Supervisor) is required. These activities are incompatible with a temporary research fellowship if the above mentioned authorisation is not given.

A temporary research fellow cannot carry out activities that can lead to a conflict of interest with the activities of the Politecnico di Milano.

The temporary research fellowship is not compatible with other research fellowships and with other scholarships, except for those awarded by national or foreign institutions for the purpose of integrating the research activities with stays abroad.

ANNEX TO THE CALL FOR APPLICATIONS FOR THE AWARD OF TEMPORARY RESEARCH FELLOWSHIPS FOR RESEARCH ACTIVITIES (issued pursuant to the "Regulations for the award of temporary research fellowships for research activities in independently funded research programmes" issued with Rectoral Decree no. 667/AG (28 February 2011), as modified with R.D. no. 3398/AG (29 July 2016).

TITLE OF THE RESEARCH "*Integrated electronic circuits to control and readout biosensors*"

PRESUMED DATE FOR STARTING ACTIVITIES **01/04/2017**

STARTING PROCESS AND EXECUTION OF THE RESEARCH PROGRAMME

The candidate will be a member of the multi-disciplinary European project Training4CRM, funded by the European Union Horizon 2020 Programme H2020- MSCA-ITN-2016 under the Marie Skłodowska-Curie Initial Training Network and Grant Agreement No. 722779. The candidate will be responsible for developing integrated electronics aimed to control and readout biosensors for in vitro and in vivo experiments. The circuits will be implemented in CMOS technology and will include:

- a high-sensitivity front-end for electrochemical biosensors;
- an actuation stage for optical and electrical stimulation of cells;
- an analog/digital interface for the communication with external components.

The integrated circuits will be fabricated, tested and mounted in a lightweight and miniaturized platform to monitor and sense cellular differentiation in vivo experiments.

ACTIVITIES THE TEMPORARY RESEARCH FELLOW WILL PERFORM, POSSIBLE OBLIGATIONS AND TERMS

In the framework of the Training4CRM project, the research activity will be focused on the design of an analog/mixed signal circuit in CMOS technology. The integrated circuit will require the design at transistor-level of low-noise low-power amplifiers and of analog/digital interface circuits. The designed circuits will be fabricated and experimentally tested. Finally, the circuits will be integrated in a miniaturized platform for biological experiments.

In addition, the candidate must meet the following requirements:

- Spend an external stay at the University of Oslo and at the Technical University of Denmark (up to 10 months);
- Participate in training events for early stage researchers organized in the framework of the Training4CRM project;
- Contributing to the reporting of project milestones and deliverables in accordance with EU deadlines.

At least 30 days before the end of the contract, the research fellow must present a written report on the research activities carried out and on the results achieved within the scope of the project.

COUNTRIES AND UNITS IN WHICH THE RESEARCH ACTIVITY MAY BE CARRIED OUT

Norway, Denmark.
