### Student worker situation

Please select the option that describes your educational and/or professional profile, then click on "Confirm and continue".

#### Student situation

- ☒ I am a full time student and spend more than 75% of my time studying
- ☐ I am a worker student and spend less than 50% of my time studying
- ☐ I am a student worker and spend between 50% and 75% of my time studying

[Back to Check Data](#)

[Confirm and continue](#)

## STEP 8: Read carefully the information, then click on “Confirm and continue”

### Information about presentation of study plan

All students, Italian and foreign, must present their Study Plan using online service in the period foreseen by the School.  
Late or missing presentation implies attribution of a penalty of a 100 Euro increase in the 2nd instalment.

For students enrolled in the first year (newly enrolled), the school allocates a study plan ex officio.

It is possible to reformulate the assigned study plan in order to change the total number of Educational Credits (ECTS). Access the Online Services and from the Career Data section choose the “Study plan - Presentation” function.  
The deadlines for reformulating the Study Plan vary according to the School and course to which they belong and are indicated in the academic calendar ([www.polimi.it/en/academic-calendar](http://www.polimi.it/en/academic-calendar)).

### Tuition fees and university contribution information

The item of the university fees denominated “all-inclusive contribution” is commensurated to the number of ECTS inserted in the Study Plan. The student may request the graduation of the “all-inclusive contribution” on the basis of the ISEE indicator of the student’s family, according to the modality and deadlines at the web page [www.polimi.it/en/fees](http://www.polimi.it/en/fees)

[Back to Student worker situation](#)

[Confirm and continue](#)

## STEP 9: Read carefully the information, then click on “Confirm and continue”

### Current regulations

I COMMIT TO COMPLY

with current regulations of the Politecnico di Milano and in particular with the Regulation concerning worker’s safety and health in the workplace as well as that concerning Patents which may be consulted on the web site of the Politecnico di Milano:  
[www.polimi.it](http://www.polimi.it)

Should the student, with the active contribution of the Structures and together with the teachers of the University during his/her education at the Politecnico di Milano, implement projects and/or documents of scientific or industrial interest, subject to his/her right to be recognised as author or co-author pursuant to current legislation, I ACKNOWLEDGE the patent rights of the Politecnico di Milano of the achieved results, in order to allow the Politecnico to activate appropriate forms of promotion of the result by sustaining related costs and acknowledging the inventor a part of any possible economic gains, in compliance with current University regulations on the subject.

Should the Politecnico not wish to promote said result the corresponding rights return to the author which may use them at will.
